

Anybus Wireless Bolt CAN - White version

Item number: AWB2021-B

The Anybus Wireless Bolt CAN - White connects CAN-based machines to wireless networks via Bluetooth[®] or Wi-Fi. Designed for multi-directional applications, it's ideal for establishing wireless connections with roaming machines, such as AGVs or control cabinets from any angle.

Connect CAN machines in multi-directional applications via Bluetooth or Wi-Fi

Features and benefits

- ✓ **Low total cost of ownership**
Thanks to the integrated design of the antenna and communication module, there's no need for additional antenna or accessory purchases.
- ✓ **Wide baud rate support**
Supports baud rates from 10 kbps to 1000 kbps.
- ✓ **Easy access to data**
Wirelessly connect to the Anybus Bolt and easily access the machine or cabinet. Configure the PLC or machine without halting or hindering production.
- ✓ **All-in-one wireless communication**
All-in-one package featuring a connector, communication processor, and integrated antenna in the same unit. Choose the white top Sunbolt option for 30% better protection against higher temperatures.
- ✓ **Industrial design**
Withstands harsh environments due to its IP66/67-rated enclosure and wide operating temperature range. Choose the white top Sunbolt option for 30% better protection against higher temperatures.
- ✓ **Easy to configure**
Establish a wireless connection in seconds thanks to the intuitive web-based interface.
- ✓ **Flexible CAN data management**
Customize your data with up to 28 freely adjustable CAN receive pass-through filters, providing precise control over incoming CAN messages for tailored and efficient communication.
- ✓ **Designed for multi-directional applications**
Ideal for establishing wireless connections to roaming machines, such as AGVs, or to control cabinets from any angle.
- ✓ **Quick start up and high determinism**
Ideal for connecting field-level devices that require short start-up times and high determinism.
- ✓ **CAN to TCP/IP data conversion**
Converts CAN 2.0A/B (11/29-bit identifier) data to TCP/IP, supporting protocols such as J1939 and CANopen, and enables the transparent transfer for any CAN protocol.
- ✓ **Easy to install**
Attach the Wireless Bolt directly onto cabinets or machines to look like an integrated part of the installation. Or use the Bolt Base Protector mounting kit to install it on a pole, wall, or similar.
- ✓ **Insights into your network**
The Command Line Interface (CLI) provides configuration and diagnostic capabilities, offering greater control and insight into your network.
