

CanEasy professional

Item number: 1.04.0144.00000

CanEasy is a Windows-based analysis and test environment for CAN (FD), LIN and Automotive Ethernet. The tool simulates the bus traffic, has a high degree of automation, can be easily configured and extended with the help of plug-ins. CanEasy can be used throughout the development process, from testing to commissioning.

Enabling software-based residual bus simulation and analysis

Features and benefits

- ✓ **Comprehensive protocol support**
Works with CAN, CAN FD, LIN, and Automotive Ethernet for diverse testing scenarios.
- ✓ **Easy user interface**
Features attractive graphical RichPanels and database editors for a user-friendly experience.
- ✓ **Hardware flexibility**
Supports a wide range of hardware adapters, making it adaptable to various test setups.
- ✓ **Diagnostic functions**
Includes support for UDS, KWP2000, XCP/CCP, and error memory display for comprehensive diagnostics.
- ✓ **Plug-in expansion**
Allows for the creation of user plug-ins in any programming language, enhancing customization.
- ✓ **Effortless configuration**
Drag-and-drop functionality combined with clear arrangements simplifies setup.

Identification and Status

Product ID	1.04.0144.00000
Country of Origin	Germany
HS Code	8517620000
Export Control Classification Number (ECCN)	EAR99
Purchasing Multiple ERP	5
