Netbiter Argos - Manage & Analyze annual fee

Item number: NB4000

Argos IoT cloud is a comprehensive solution for remote monitoring and control of field equipment. Make sure your generator is ready to start if needed. Make sure your panels are connected. Whatever equipment you use to generate power, Netbiter Argos lets you manage it remotely 24/7/365.

Field equipment management cloud

Features and benefits

✓ **Monitor your field equipment remotely**

Argos IoT cloud is a complete end-to-end solution focused on providing easy monitoring and management of remote sites and equipment (PowerGen, tank monitoring, renewable and hybrid energy, etc).

✓ **Stay on top of alarms**

Argos triggers alarms for specific events or conditions. Receive instant notifications about equipment levels, accessing both current and historical alarms.

✓ **Control systems & users**

Get an instant overview of your systems and users' access rights. Enjoy a comprehensive project management feature that lets you specify projects and functions. Get full control of systems and users.

✓ **Rely on strong hosting & security measures**

Rely on solid hosting & security: Argos servers are hosted in a professional environment with redundant systems and geographically separated setups, ensuring stable operation with trained personnel.

✓ **Visualize equipment data**

Argos uses Ewon Netbiter's data for graphical dashboards, allowing users to create visual layouts of remote installations with analog and digital components for easy understanding.

✓ **Get automatic trends & reports**

Learn how your equipment performs in the field. Add logged values to your graphs in a few clicks. Easily analyze field data and spot deviations. Optimize and reduce energy consumption in installations

✓ **Integrate data (Argos API)**

Bring data from the field into your own applications. Argos API enables custom web interfaces for users. It allows data integration with external systems, facilitating data refinement and combination.

✓ **Remote access to field equipment**

Configure a PLC or machine in the field remotely. Argos opens up a secure tunnel to a PLC or machine. It enables configuration, programming or debugging of almost any industrial device from anywhere.
