

Anybus X-gateway -PROFINET-IRT Device -PROFIBUS Slave

Item number: AB7508-F

The Anybus X-gateway PROFINET-IRT Device to PROFIBUS Slave enables you to connect any PROFINET-IRT system to any PROFIBUS control system. Anybus gateways ensure reliable, secure, high-speed data transfers between different industrial networks while being easy to use.

Features and benefits

Reach new markets

Target new markets using different protocols without needing to change your hardware or software, thereby decreasing your time to market and development costs.

Slim hardware design

The gateway is designed for IP20 and DIN-rail mounting, enabling you to install it with ease, close to connected devices, thereby reducing wiring requirements.

Easy configuration – No programming required!

Quickly establish the connection between the two networks with the included Anybus Configuration Manager software. No programming skills are required for the setup process.

Trusted partner

Anybus has a long history of working with all the major network organizations to ensure compliant, highperforming, and compatible products.

A protocol converter that connects PROFINET-IRT and PROFIBUS control systems

No PLC card slot needed

The gateway does not use a card slot in the control system, leaving room for other equipment.

3-year warranty

The gateway is designed to be robust and long-lasting. A 3-year guarantee is provided

Increased PLC performance

The gateway allows for fast transfer of cyclic I/O data between the two networks, offloading your PLC from working with additional calculations.

Life cycle management

HMS maintains every part of the gateway, including network updates, throughout the product's lifecycle.
