

Ixxat INpact cable

Item number: 1.04.0340.00000

The INpact cable, with a length of 150 mm, serves as an essential link between the bus coupling unit and the INpact interface board. It enables reliable signal and data transmission over a short distance between the components.

Connects Ixxat INpact interface boards and bus coupling units (150 mm)

Features and benefits

✓ Reliable Connection

Tailored to Ixxat INpact boards in a M.2 or PCIe Mini format, the cable provides a secure and efficient connection to the bus coupling unit, ensuring reliable data transfer.

✓ Simple integration

Its 150 mm length offers enough flexibility for easy installation and arrangement within confined spaces in industrial setups.
