

## Mitsubishi Heavy Industries VRF systems to Home Automation Application

Item number: IN776MHI00SO000

The Mitsubishi Heavy Industries application has been specially designed to allow bidirectional control and monitoring of Mitsubishi Heavy Industries VRF systems from a Home Automation system. The solution allows the integration of up to 16 indoor units from a single interface.

*Mitsubishi Heavy Industries to Home Automation - Up to 16 Indoor Units*

### Features and benefits

- ✓ **IP Home Automation integration**  
Thanks to our open ASCII protocol integration of any IP Home Automation System is easily achievable.
- ✓ **Direct Ethernet connection**  
The interface is directly connected via Ethernet to the home's local IP network,
- ✓ **Outdoor unit signals**  
Signals assigned to the outdoor unit are available to be used in the integration.
- ✓ **Driver compatibility**  
A wide range of compatible drivers is available on the Intesis webpage.
- ✓ **Direct access to the outdoor unit**  
Connection is simple, as the interface connects directly to the outdoor unit's communication bus.
- ✓ **Automatic identification**  
A scan function is available for automatic identification of the units present in the VRF system.
- ✓ **Multiple TCP client support**  
The interface supports up to 6 TCP clients (incoming sockets).
- ✓ **Commissioning-friendly approach with Intesis MAPS**  
Templates can be imported and reused as often as needed, significantly reducing commissioning time.
