

## Anybus X-gateway – DeviceNet Adapter - Interbus FO Slave

### Item number: AB7858-F

The Anybus X-gateway DeviceNet Adapter to Interbus FO Slave enables you to connect any DeviceNet control system to any Interbus FO control system. Anybus gateways ensure reliable, secure, high-speed data transfers between different industrial networks while being easy to use.

## Features and benefits

## Reach new markets

Target new markets using different protocols without needing to change your hardware or software, thereby decreasing your time to market and development costs.

### Slim hardware design

The gateway is designed for IP20 and DIN-rail mounting, enabling you to install it with ease, close to connected devices, thereby reducing wiring requirements.

## Easy configuration – No programming required!

Quickly establish the connection between the two networks with the included Anybus Configuration Manager software. No programming skills are required for the setup process.

#### Trusted partner

Anybus has a long history of working with all the major network organizations to ensure compliant, highperforming, and compatible products.

A protocol converter that connects DeviceNet and Interbus FO control systems

## No PLC card slot needed

The gateway does not use a card slot in the control system, leaving room for other equipment.

## 3-year warranty

The gateway is designed to be robust and long-lasting. A 3-year guarantee is provided

## Increased PLC performance

The gateway allows for fast transfer of cyclic I/O data between the two networks, offloading your PLC from working with additional calculations.

## ✓ Life cycle management

HMS maintains every part of the gateway, including network updates, throughout the product's lifecycle.
