

## i4bacnet

Item number: 3001-025000

i4bacnet is equipped with many features that allow you to create a complete BACnet BMS in no time. You can use it with all browsers and on all devices independent of the operating system.

*Web-based management control system for your building management system.*

## Features and benefits

### ✓ Implement your BACnet-compliant BMS

i4bacnet is a web-based management and operations software for building management systems.

### ✓ Professional look and feel

The i4bacnet HTML components with their professional look and feel are also available as SmartEditor extensions.

### ✓ Transparent and homogeneous

The i4bacnet service hub connects any number of i4bacnet services with i4scada and i4connected to a transparent and homogeneous application - both on-premises and in the cloud.

### ✓ Modern and web-based

i4bacnet is a modern, fully web-based and BACnet compliant management and operating unit software.

### ✓ Automatic detection of BACnet devices

i4bacnet automatically detects all connected BACnet devices - even during runtime.

### ✓ Suited for advanced applications

Thanks to the integration into the IIoT platform i4connected, you can quickly and easily implement applications such as energy management, condition monitoring or alarm management.
