

i4bacnet

Item number: 3001-004000

i4bacnet is equipped with many features that allow you to create a complete BACnet BMS in no time. You can use it with all browsers and on all devices independent of the operating system.

Web-based management control system for your building management system.

Features and benefits

✓ Implement your BACnet-compliant BMS

i4bacnet is a web-based management and operations software for building management systems.

✓ Professional look and feel

The i4bacnet HTML components with their professional look and feel are also available as SmartEditor extensions.

✓ Transparent and homogeneous

The i4bacnet service hub connects any number of i4bacnet services with i4scada and i4connected to a transparent and homogeneous application - both on-premises and in the cloud.

✓ Modern and web-based

i4bacnet is a modern, fully web-based and BACnet compliant management and operating unit software.

✓ Automatic detection of BACnet devices

i4bacnet automatically detects all connected BACnet devices - even during runtime.

✓ Suited for advanced applications

Thanks to the integration into the IIoT platform i4connected, you can quickly and easily implement applications such as energy management, condition monitoring or alarm management.
