Hisense VRF systems to Home Automation Application

Item number: IN770AIR00SO000

The Hisense application has been specially designed to allow bidirectional control and monitoring of Hisense VRF systems from a Home Automation system. The solution allows the integration of up to 16 indoor units from a single interface.

Hisense to Home Automation - Up to 16 Indoor Units

Features and benefits

✓ **IP Home Automation integration**

Thanks to our open ASCII protocol integration of any IP Home Automation System is easily achievable.

✓ **Direct Ethernet connection**

The interface is directly connected via Ethernet to the home's local IP network,

✓ **Outdoor unit signals**

Signals assigned to the outdoor unit are available to be used in the integration.

✓ **Driver compatibility**

A wide range of compatible drivers is available on the Intesis webpage.

✓ **Direct access to the outdoor unit**

Connection is simple, as the interface connects directly to the outdoor unit's communication bus.

✓ **Automatic identification**

A scan function is available for automatic identification of the units present in the VRF system.

✓ **Multiple TCP client support**

The interface supports up to 6 TCP clients (incoming sockets).

✓ **Commissioning-friendly approach with Intesis MAPS**

Templates can be imported and reused as often as needed, significantly reducing commissioning time.
