# i4bacnet

Item number: 3001-100000

i4bacnet is equipped with many features that allow you to create a complete BACnet BMS in no time. You can use it with all browsers and on all devices independent of the operating system.

Web-based management control system for your building management system.

Features and benefits

✔ **Implement your BACnet-compliant BMS**

i4bacnet is a web-based management and operations software for building management systems.

✔ **Professional look and feel**

The i4bacnet HTML components with their professional look and feel are also available as SmartEditor extensions.

✔ **Transparent and homogeneous**

The i4bacnet service hub connects any number of i4bacnet services with i4scada and i4connected to a transparent and homogeneous application - both on-premises and in the cloud.

✔ **Modern and web-based**

i4bacnet is a modern, fully web-based and BACnet compliant management and operating unit software.

✔ **Automatic detection of BACnet devices**

i4bacnet automatically detects all connected BACnet devices - even during runtime.

✔ **Suited for advanced applications**

Thanks to the integration into the IIoT platform i4connected, you can quickly and easily implement applications such as energy management, condition monitoring or alarm management.
