Panasonic Etherea AC units to BACnet/IP & MS/TP Interface

Item number: INBACPAN001I000

The Panasonic-BACnet interface allows full bidirectional communication between Panasonic Etherea Air Conditioner units and BACnet/IP or MS/TP networks. The interface enables BACnet communication via polling or subscription requests (COV), making the indoor unit available through independent BACnet objects.

Panasonic to BACnet/IP & MS/TP - 1 indoor unit

Features and benefits

✓ **Support for BACnet/IP and BACnet MS/TP**

BACnet/IP (via Ethernet) or BACnet MS/TP (via EIA-485) connection options are supported.

✓ **IP settings available via a web interface**

A configuration tool is available via a web interface with IP settings and more information.

✓ **Occupancy function to allow energy savings**

Occupancy function that helps reduce costs, as HVAC systems are one of the main energy consumers.

✓ **AC unit control by remote and BACnet/IP or MS/TP**

The AC unit can simultaneously be controlled via BACnet/IP or MS/TP and its own remote controller.

✓ **Configuration from onboard DIP switches**

The interface configuration is carried out directly through its onboard DIP switches.

✓ **AC unit data served as fixed BACnet Objects**

Air conditioning unit properties and functionalities are abstracted into fixed BACnet Objects.

✓ **Total unit control and monitoring from BACnet**

Through internal variables, running hours counter (for maintenance purposes), and error indication.

✓ **No external power required**

The interface is powered directly from the AC unit, so no external power supply is required.
