Anybus Wireless Bolt LTE Japan Docomo - White version

Item number: AWB1505-B

The Anybus Wireless Bolt LTE Japan Docomo - White is an industrial-grade router designed to provide high-speed transparent internet access to both stationary and mobile industrial machines. Utilizing LTE (4G) with 3G fallback, it enables comprehensive remote monitoring and analysis, increasing system uptime and reducing maintenance costs.

Connects industrial machines to 4G and or 3G networks.

Features and benefits

Low total cost of ownership

Thanks to the integrated design of the antenna and communication module, there's no need for additional antenna or accessory purchases.

Fast data transfer

Download up to 100 Mbit/s, Upload up to 50 Mbit/s.

Cellular access for top-level machines

Ideal for providing cellular access to machines on the enterprise or management levels within the automation pyramid.

Built-in software

Includes a firewall, NAT, DHCP server, and GNSS satellite positioning function (GPS, GLONASS, Galileo, and BeiDou).

Industrial design

Withstands harsh environments due to its IP66/67-rated enclosure and wide operating temperature range. Choose the white top Sunbolt option for 30% better protection against higher temperatures.

Easy to configure

Establish a wireless connection in seconds thanks to the intuitive web-based interface.

Secure LTE connectivity with 3G fallback

Provides secure LTE Cat-4 connectivity for 4G networks with 3G fallback. The Nano SIM-card slot allows users to utilize any locally available SIM-card supporting LTE Cat-4.

Compatible with any TCP or UDP-based protocol

Transparently transfer data across any TCP or UDP-based protocol, including MQTT and OPC UA.

All-in-one wireless communication

All-in-one package featuring a connector, communication processor, and integrated dual antenna in the same unit. Use a single cable for both power and communication with Power over Ethernet (PoE).

Perfect together!

Fully compatible with Anybus Wireless Bridge, a wireless product designed for point-to-point applications, enabling you to implement comprehensive wireless infrastructure.

Easy to install

Attach the Wireless Bolt directly onto cabinets or machines to look like an integrated part of the installation. Or use the Bolt Base Protector mounting kit to install it on a pole, wall, or similar.

Insights into your network

The Command Line Interface (CLI) provides configuration and diagnostic capabilities, offering greater control and insight into your network.
