Advanced Configuration Tool Lite

Item number: 1.12.0248.00000

The Advanced Configuration Tool (ACT) is a powerful and easy to use PC software package for Windows versions 10 and 11. The tool is used to create configurations for the CANnector and FRC-EP devices. After having created such a configuration, it is downloaded to the device and being executed there standalone.

Configuration software for Ixxat FRC-EP170, FRC-EP190 and CANnector

Features and benefits

Intuitive management

Easy device management with drag-and-drop and graphical configuration elements.

Comprehensive format support

Compatible with common database formats like DBC, LDF, Fibex, and ARXML for signal interpretation.

Independent operation

Configurations created can be downloaded and run independently on devices.

Visual data analysis

Offers signal visualization functionality and websockets support for real-time data analysis.

Development support

Comes with IxAdmin, Vehicle Editor, and Gateway among other development tools.

Flexible extensions

Offers the capability to extend functionality with C user code or Matlab/Simulink.

Versatile configuration tool

Serves all use cases and hardware devices, like FRC-EP and CANnector, with an easy upgrade path to more advanced versions.

Extensive protocol support

Includes FlexRay, CAN, CAN FD, LIN protocol support, and more for diverse automotive testing.

Seamless integration

A special EtherCAT extension for FRC-EP 190 and CANnector devices enhances connectivity.

Multi-license use

A USB licensing dongle allows use across multiple PCs, adding convenience for team environments.
