

DALI-2 to BACnet/IP & MS/TP Server Application with 1 DALI channel

Item number: IN703DAL0640000

Integrate any DALI/DALI-2 driver and DALI-2 input devices like light or occupancy sensors with a BACnet BMS or any BACnet/IP or BACnet MS/TP controller. This integration aims to make DALI devices and their data and resources accessible from a BACnet-based control system or device as if they were a part of the BACnet system and vice versa.

DALI to BACnet/IP or BACnet MS/TP - 1 DALI channel

Features and benefits

- ✓ **BACnet support**
The gateway is BTL certified and supports both BACnet/IP and BACnet MS/TP protocols.
- ✓ **BACnet advanced features**
BACnet's advanced features, such as calendars, trend logs, schedules, and more, are available.
- ✓ **DALI support**
The gateway is DALI-2 certified and supports DALI/DALI-2 drivers and DALI-2 input devices: Push buttons, absolute input devices, and occupancy and light sensors.
- ✓ **Easy DALI commissioning/integration w/Intesis MAPS**
Integration and DALI commissioning processes are managed via the Intesis MAPS configuration tool. Templates can be imported and reused as often as needed, significantly reducing commissioning time.
- ✓ **Local control options**
Occupancy and light sensors, push buttons, and absolute inputs can be locally controlled from the gateway. The DALI standard device type for Energy and Diagnostic data has also been implemented.
- ✓ **Color control**
RGB and tunable white controls are available in Intesis MAPS, to cover the demand for Human Centric Lighting.
- ✓ **Max 64 drivers/ballasts + 64 DALI-2 input devices**
Supports up to 64 drivers/ballasts + 64 DALI-2 input devices (sensors/push buttons/absolute inputs).
- ✓ **Signals and power**
A DALI power supply is integrated into the gateway, so no external power supply is required. Up to 10,000 signals can be defined in total, with a guaranteed output current of 230 mA.
