

i4bacnet

Item number: 3001-007500

i4bacnet is equipped with many features that allow you to create a complete BACnet BMS in no time. You can use it with all browsers and on all devices independent of the operating system.

Web-based management control system for your building management system.

Features and benefits

- ✓ **Implement your BACnet-compliant BMS**
i4bacnet is a web-based management and operations software for building management systems.
- ✓ **Professional look and feel**
The i4bacnet HTML components with their professional look and feel are also available as SmartEditor extensions.
- ✓ **Transparent and homogeneous**
The i4bacnet service hub connects any number of i4bacnet services with i4scada and i4connected to a transparent and homogeneous application - both on-premises and in the cloud.
- ✓ **Modern and web-based**
i4bacnet is a modern, fully web-based and BACnet compliant management and operating unit software.
- ✓ **Automatic detection of BACnet devices**
i4bacnet automatically detects all connected BACnet devices - even during runtime.
- ✓ **Suited for advanced applications**
Thanks to the integration into the IIoT platform i4connected, you can quickly and easily implement applications such as energy management, condition monitoring or alarm management.

General

I4 License Version	V1.33
--------------------	-------

Identification and Status

Product ID	3001-007500
Country of Origin	Germany
HS Code	Not Applicable
Dual Usage	No

Physical Features

Contains Battery	No
------------------	----
