i4bacnet

Item number: 3012-000010

i4bacnet is equipped with many features that allow you to create a complete BACnet BMS in no time. You can use it with all browsers and on all devices independent of the operating system.

Web-based management control system for your building management system.

Features and benefits

Implement your BACnet-compliant BMS

i4bacnet is a web-based management and operations software for building management systems.

Professional look and feel

The i4bacnet HTML components with their professional look and feel are also available as SmartEditor extensions.

Transparent and homogeneous

The i4bacnet service hub connects any number of i4bacnet services with i4scada and i4connected to a transparent and homogeneous application - both on-premises and in the cloud.

Modern and web-based

i4bacnet is a modern, fully web-based and BACnet compliant management and operating unit software.

Automatic detection of BACnet devices

i4bacnet automatically detects all connected BACnet devices - even during runtime.

Suited for advanced applications

Thanks to the integration into the IIoT platform i4connected, you can quickly and easily implement applications such as energy management, condition monitoring or alarm management.

i4bacnet

General

I4 License Version	V1.33

Identification and Status

Product ID	3012-000010
Country of Origin	Germany
HS Code	Not Applicable
Dual Usage	No

Physical Features

Contains Battery	No
