

i4connected lite

Item number: 4704-Lite

i4connected Lite Edition is a cloud-based platform that simplifies industrial data collection by centralizing machine and system insights into intuitive dashboards. It delivers secure, enterprise-ready access with seamless HMS gateway integration. Quick onboarding and scalable connectivity make deployment easy across operations. With clear limits and simple licensing, it provides powerful insights without added complexity

The easy & predictable IIoT platform for your HMS Gateways

Features and benefits

- ✓ **Simplified industrial data collection**
Bring industrial data from devices, machines, and systems into one centralized platform. i4connected Lite Edition focuses on essential data collection and visibility, removing unnecessary complexity
- ✓ **Integrated with HMS gateways**
Works seamlessly with HMS hardware, including: Ewon Flexy & Netbiter, Red Lion FlexEdge & Graphite HMIs, Anybus Atlas, and more
- ✓ **Simplified onboarding & UX**
Get started quickly with guided onboarding through videos and webinars. A new clean, intuitive interface accelerates adoption and reduces training effort.
- ✓ **Clear limitations**
Collect and store up to 50 million RAW records and 1 Million alarms (10 GB FIFO database) for transparent and reliable historical data access.
- ✓ **Custom dashboards, your way**
Create tailored dashboards using i4designer, adapted to operators, engineers, and managers. Comparing Data of multiple machines in one Dashboard is possible.
- ✓ **Enterprise-ready hosting & security**
Fully Azure-hosted solution with a dedicated tenant, URL and custom company logo. Easy upgrade to i4connected standard
- ✓ **Easy to scale**
Connect unlimited devices and tags using core adapters: Ewon Talk2m Datamailbox, Netbiter Argos API & MQTT.
- ✓ **Simple & clear licensing**
One simple annual prepaid subscription, no device- or tag-based licensing & clear limits. Includes technical support and an extensive online knowledge base.
