Anybus OT SDN Controller End-Point License - 1 Year

Item number: ABD-SDN-LIC-1Y-1

License for the OT-SDN Controller, enabling centralized orchestration of industrial networks with software-defined segmentation. Providing policy-driven control, real-time visibility, and secure connectivity across distributed sites, it empowers operators of manufacturing and critical infrastructure to simplify management, enforce zero-trust zones, and strengthen cyber resilience.

Anybus OT SDN Controller End-Point-License - Annual Subscription - Quantity 1

Features and benefits

Segmentation & Connectivity

Industrial-hardened design supporting multi-segment SDN zoning with Gigabit Ethernet and SFP uplinks. Create logical microsegments beyond physical port limits using SDN-controlled VLANs and virtual conduits for IT/OT and intra-OT separation.

Dynamic Asset & Flow Awareness

Real-time network discovery of OT assets and their communication flows. Automatically builds an asset inventory with firmware, patch levels, and protocol usage. Visualizes traffic baselines and flags anomalies or policy violations.

Intuitive Control Interface

Centrally managed through an SDN Controller GUI with topology views, drag-and-drop policy creation, and wizards for common OT use cases. Policies can be defined once and applied dynamically across all zones, simplifying complex network enforcement.

Anybus OT SDN Controller End-Point License - 1 Year

Identification and Status

Product ID	ABD-SDN-LIC-1Y-1
Country of Origin	United States of America (the)
HS Code	Not Applicable
Dual Usage	No
Export Control Classification Number (ECCN) (Applies only to the U.S)	EAR99

Physical Features

Contains Battery	No
